

TRACKING

Asset Tracker

Technical Overview

3SI Security Systems offer proven GPS tracking solutions that combine aided GPS, Cellular and Radio Frequency (RF) location technologies with a secure tracking website. Available in a variety of designs

Asset Tracking Device

Asset Tracker combines three location-based technologies, GPS/Cellular/RF, in a single tracking device designed to be easily hidden in frequently stolen items. Cargo, jewellery, couriers, electronics, cash, vehicles and anything that needs to be tracked, can be with Asset Tracker.

Features

- Robust Sealed Case
- Motion trigger
- Real time ping trigger
- Configurable motion sensitivity, update rates, and interval reporting
- Configurable (Geo) Fences
- GPS location accurate within feet
- RF pinpoints final Device location
- Stores location data if cellular signal is lost during tracking
- Tracking data stored for evidence
- Multiple options to extend battery life
- Text and email alerts
- Rechargeable battery
- Secure website for live tracking

Advantages

- Perfect for covert and mobile applications
- Automatically tracks after activation
- Can link multiple Devices to specific fence locations
- Can suppress alerts in geo-fenced locations
- Multiple technologies pinpoint Device location
- Device hibernation and wake up programmable to save battery
- Reliable performance in Urban Canyon areas
- Highly configurable to meet the type of crime and battery life needed
- Easy to use and maintain

Dimensions

70mm x 50mm x 25mm

Weight : 150g
