

# HUD Tracking Tobacco Tracker

Highly effective and proven covert technology  
to combat convenience store tobacco crime.

## Technical Overview

### Tobacco Tracking Device

Tobacco Tracker combines three location-based technologies, GPS/Cellular/RF, in a single robust tracking device hidden in plastic sealed Australian cigarette packaging.

3SI Security Systems offer proven GPS tracking solutions that combine aided GPS, Cellular and Radio Frequency (RF) location technologies with a secure tracking website. Available in a variety of designs to track all types of valuable assets, our system has led to the recovery of millions in stolen cash and assets.

### Features

- Motion triggered by 10 Sec continuous motion
- Store GeoFence determines level of alert
- 6 Second location Polling rate for accurate tracking
- GPS location accurate within feet for rapid recovery
- RF pinpoints final Device location if concealed
- Stores location data if cellular signal is lost during tracking
- Tracking data stored for evidence
- Remote Ping rate management to extend battery life
- Text and email alerts
- Rechargeable battery with induction charger
- Secure website for live tracking

### Advantages

- Improved workplace safety
- Perfect for covert and mobile applications
- Automatically tracks after activation
- Can link multiple Devices to specific store locations
- Multiple technologies pinpoint Device location
- Device hibernation if false alarms in store
- Reliable performance in Urban Canyon areas
- Easy to use and maintain
- Possible reduction in insurance premiums
- Easy to re-allocate and transfer to another store location
- Proven Technology with Australian Track record
